## **Installation in Visual Studio 2019 Community version:**

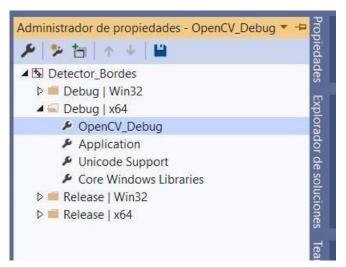

- Download OpenCV from <a href="https://sourceforge.net/projects/opencvlibrary/files/4.3.0/opencv-4.3.0vc14">https://sourceforge.net/projects/opencvlibrary/files/4.3.0/opencv-4.3.0vc14</a> vc15.exe/download
- 2. Unzip into a path preferably containing no whitespace or foreign characters.
- 3. Create the OPENCV\_DIR environment variable:

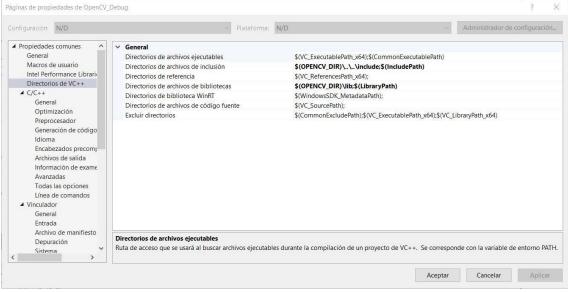

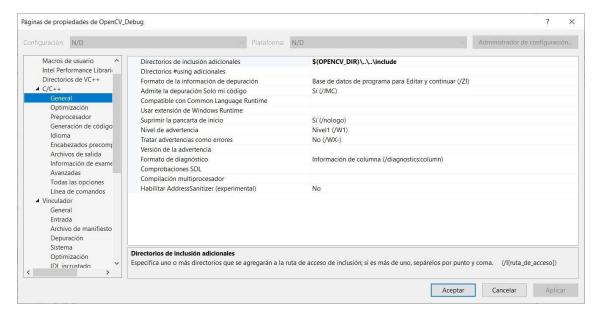

- 4. Install Visual Studio:
- 5. Create a new empty project, preferably do not put the solution in the same project directory.

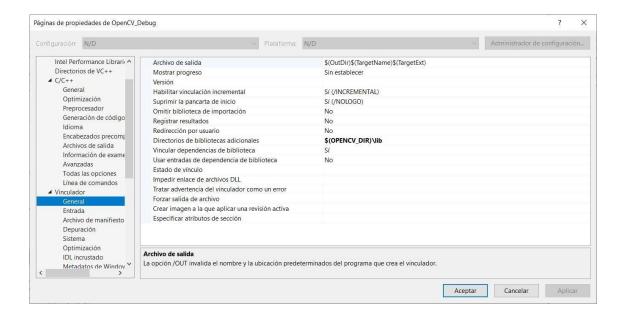

- 6. Copy the source files into the root folder of the project.
- 7. Create a custom property from the property manager tab in the Debug | x64 and Release | x64 and edit the following fields:

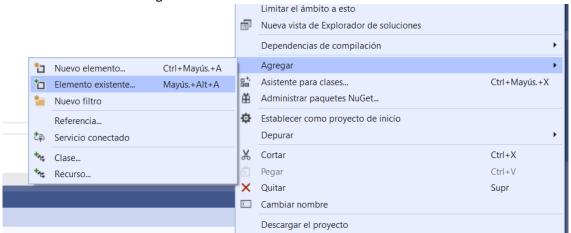

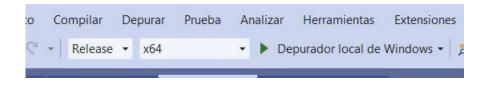

8. Add source files as existing elements:

9. Select execution options as Release x64 or Debug x64:

If everything went well, you should be able to successfully run the project.
